EXPERIENCE

E-Commerce & Technical Manager — Sarasota, FL
Eleganza Sarasota — *June 2021 – Present*

- Built Python data pipeline to sync analytics between Squarespace, Clover POS, and Google Analytics, automating reports that increased sales by 7%
- Developed real-time inventory sync between Squarespace and Clover APIs for 500+ SKUs, greatly reducing oversells.
- Created analytics dashboard to track conversion funnels and social campaigns, optimizing checkout flow for 11% higher conversion rate.

Software Development Intern — Remote
The Global Tech Experience — *June 2023 – August 2023*

- Built interactive dashboard SPA using JavaScript, HTML/CSS, and REST APIs with Chart.js for data visualization
- Collaborated with 4-person team to deliver SPA MVP in 6-week sprint.

PROJECTS

folio.dev | *Typescript, Next.js, Polar.sh, PostgreSQL, Tailwind CSS* — 2025

- Co-founded a multi-tenant portfolio SaaS using Next.js App Router with custom subdomains.
- Built reusable component architecture and themes that scales across multiple tenant portfolios.
- Integrated GitHub APIs to auto-sync project data and Github links with tech stack visualization.
- Created analytics route that tracks user's who visit user's posted portfolio, providing OS, Device type, browser, and rerouting information.

Ivra.ai | *Next.js, Tailwind, n8n, Python* — 2025

- Designed n8n pipeline for CRM automation, scheduling follow-ups and improving returning customer engagement workflows.
- Created SaaS based AI voice assistant dashboard, with elevanLabs voice assistant for automated appointment scheduling.
- Prototyped RAG pipeline with vector database integration, enabling natural language queries over structured + unstructured data using Pandas.

Fitness Tracker | *React, Tailwind, Firebase* — 2024

- Developed full-stack mobile fitness app with workout logging and progress tracking for 100+ exercises, allowing the user to create custom exercises.
- Implemented real-time sync across devices using Firestore.
- Built responsive UI with 15+ reusable componentes and custom hooks for state management.
