EDUCATION

University of South Florida — Tampa, FL
Bachelor of Science in Information Technology — *Aug. 2022 – Dec. 2024*

TECHNICAL SKILLS

Languages: JavaScript, Typescript, Python, C, SQL, NoSQL, HTML, CSS
Frameworks: Angular, React, React Native, Next.js, Node.js, .NET Framework
Development: Agile, Git, Firebase, Supabase, MongoDB
DevOps & Cloud Computing: AWS, Azure, Docker

EXPERIENCE

Sales Manager — Sarasota, FL
Eleganza Sarasota — *June 2021 – Present*
- Analyzed customer behavior data to optimize digital sales funnel, increasing conversion by 25%
- Oversaw online sales, including product management, customer acquisition, and retention to create analytics
- Managed e-commerce platform integrations and troubleshot technical issues

Software Development Intern — Remote
The Global Tech Experience — *June 2023 – August 2023*
- Built responsive single-page applications using JavaScript, implementing component-based architecture with RESTful API integration
- Participated in daily standups and sprint planning following Agile methodologies

PROJECTS

folio.dev | *Typescript, Next.js, Polar.sh, PostgreSQL, Tailwind CSS* — 2025
- Co-founded a multi-tenant portfolio SaaS using Next.js App Router with dynamic subdomain routing
- Built reusable component architecture and themes that scales across multiple tenant instances
- Integrated GitHub APIs to auto-sync project data with tech stack visualization
- Implemented real-time data synchronization using Supabase subscriptions
- Collaborated with team using Git workflows, code reviews, and Agile sprints

Fitness Tracker | *React, Tailwind, Firebase* — 2024
- Developed modular, reusable React components following separation of concerns principles
- Utilized Tailwind CSS for design, enhancing user experience across different devices
- Integrated Firebase for user authentication, real-time data management, and Firestore integration for workout storage and profile management
- Created custom hooks and services for data fetching and business logic separation

Custom Cloud Infrastructure | *AWS* — 2024
- Configured & deployed VM on AWS EC2 with strict security controls
- Implmented inbound rules to restrict access using security groups
- Utilized monitoring tools to ensure security and resource utilization

Stock Analyzer & Predictor | *C#* — 2024
- Utilized C# and .NET framework to develop a scalable and efficient application with optimized performance
- Technical analysis features including Fibonacci retractment levels and custom beauty metrics for price movement prediction

Ecommerce Store | *HTML, CSS, JavaScript, MongoDB, Bootstrap* — 2023
- Designed a responsive e-commerce website using HTML, Bootstrap, and CSS to ensure user experience across multiple device formats
- Implemented dynamic website functions using JavaScript, such as dynamic loading of products
- Integrated MongoDB as the backend database solution
